

# AUTOMATIC STICK INFEED SYSTEM

---

## BOOMERANG STICKS PRE-FEEDER

Novilco's automatic stick infeed system will keep up with your stacking operation at any speed. It's a reliable, efficient, fully automated system which requires minimum operator intervention.

---

The Boomerang, an exclusive design by Novilco, is a sticks pre-feeder that prevents jams in the sticks unscrambler. A must have on your sticking line.

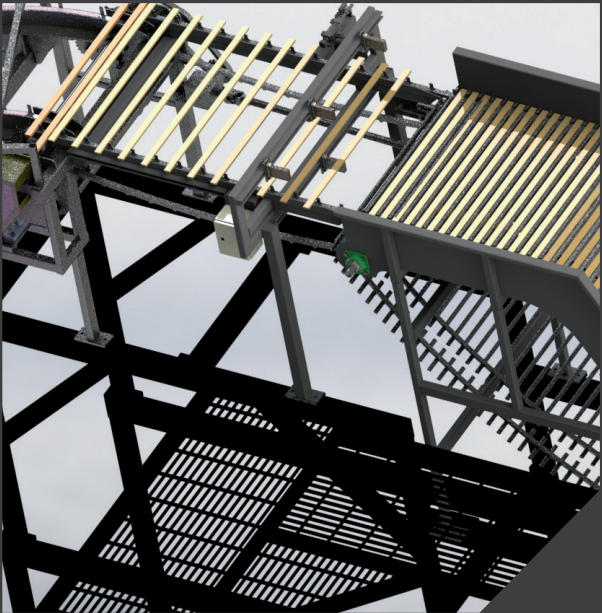

***novilco***

## BOOMERANG STICKS PRE-FEEDER

- Enhances performance of the sticks unscrambler
- Straightens sticks without operator intervention
- Eliminates jams
- Pneumatic system
- Exclusive to Novilco

## AUTOMATIC STICK INFEEED SYSTEM

- Good for any dimensions of sticks or lathes, up to 8' long
- Handles defective sticks such as bows, curves and twists, minimizing rejects
- Supplies up to 450 sticks/min
- The recirculation system reduces handling which results in less breaks, jams and rejects
